

Electronic Data Exchange Standards for Energy Deregulation in New York

**814 Enrollment Request &
Response**

**~~EDI 814 Data Dictionary
Request and Response~~**

October 23, 2014
Version 2.1

	Summary of Changes
July 20, 2001	Initial Release
August 7, 2002	Version 1.1 Issued
	Added REF*AJ (Utility Account Number for ESCO/Marketer) segment. Renumbered lines and corrected line references as necessary. Corrected use attribute for the N302 element in the N1*8R and N1*BT loops from 'Required' to 'Conditional' per the October 2, 2001 clarification. This element is only sent in an Enrollment Accept Response transaction when the street address exceeds 55 characters. Modified the Comment for the REF*65 (Meter Cycle Code) and REF*BF (Bill Cycle Code) to clarify that these segments are only required on an enrollment accept response. Corrected use attribute for the REF03 element in the REF*65 (Meter Cycle Code) and REF*BF (Bill Cycle Code) from 'Optional' to 'Conditional' per the October 2, 2001 clarification. Corrected use attribute for the REF03 element in the REF*TU (Use Time of Day) segment from 'Conditional' to 'Required' per the October 2, 2001 clarification. Corrected use attribute for the N3 and N4 segments in the N1*BT (Mailing Address) segment from 'Required' to 'Conditional'. Mailing address information is only sent in an Enrollment Accept Response when the E/M is the bill presenter AND the customers mailing address differs from service address. Corrected the Comment for the REF03 element in the REF*1P (Response Information or Warnings) segment to refer to details regarding an accept enrollment response. Modified the Comment for the REF*93 (Fee Approved/Fee Applied) segment to clarify that this segment is applicable to an accept response to a request for consumption history. Modified the Comment for the following segments to clarify that "accept response" pertains to an enrollment request (versus a secondary request for consumption history): REF*BLT, REF*PC, REF*NR, REF*SU, REF*GC, REF*GS, REF*RP, DTM*150, and all segments in the NM1 loop.

November 26, 2002	Version 1.2 Issued
	Added a new AMT segment (AMT*FW) to enable ESCO/Marketers to send fixed charge information when the bill option is Utility Rate Ready consolidated billing.
March 17, 2004	Version 1.3 Issued
	Added code values to the 02 element in the REF*TU segment to enable Orange & Rockland Utilities, Inc. and Consolidated Edison of New York, Inc. (or other utilities at their option) to describe in more detail in an Accept Response transaction, the type of electric usage data ESCOs can expect to receive in either an 867HU or 867MU transaction. Added AMT*9M and AMT*9N to enable ESCOs to transmit customer's tax rate information when the bill option requested is Utility Rate Ready consolidated billing and the Utility requires ESCOs to provide this data in an Enrollment transaction. When different tax rates are applicable to portions of the customers service it will be necessary to send both the AMT*9M (residential tax rate applicable to a portion of the service) and the AMT*9N segment (commercial tax rate applicable) when a REF*RP segment is present in a Request transaction. Corrected coding and notes associated with the REF*GC (Gas Capacity Assignment/Obligation) segment.
May 17, 2006	Version 2.0 Issued
	All references to Niagara Mohawk or NMPC are revised to reflect the distribution utility's new name (National Grid). References to RG&E's use of the Single Retailer Model have been deleted. This model is no longer offered in Rochester's service territory. The BGN06 (Reference Identification in the Beginning Segment) element notes are revised to allow for transmitting the text 'MANUAL' in an Enrollment Accept Response transaction initiated by the utility does not have a corresponding Request transaction, for example, an ESCO Referral Program enrollment. An N106 element is added to the N1*8R (Customer) segment to be used in an Enrollment Accept Response transaction to indicate that the customer enrolled is an ESCO Referral Program participant. A PER segment is added to the N1 (Customer) Loop to enable utilities to transmit the customer's telephone number in an Accept Response transaction when the customer was enrolled with the E/M through participation in a utility sponsored ESCO Referral Program.

	Version 2.0 Continued
	Code 'FNA' (Fee Not Authorized) was deleted from the list of codes in the REF*7G (Reject Response Reasons) segment. Under the Uniform Business Practices issued August 2, 2004 a utility may no longer impose a charge for providing a customer's consumption history (section 4.2.a.) or a gas profile (section 4.2.b.). The REF*93 (Fee Approved/Fee Applied) segment is deleted as unnecessary. Fees may no longer be assessed for the consumption history or gas profile data described in section 4.2. of the Uniform Business Practices. A REF03 element was added to the REF*12 segment (Utility Account Number) for use on Enrollment Requests sent to or received from Orange & Rockland Utilities when a request pertains to enrolling the un-metered portion of a customer's electric service when both metered and un-metered service are present on the same account. The usage attributes for the REF*PC (Bill Calculator) and REF*BLT (Bill Calculator) are revised. These segments are required in Enrollment Request and Enrollment Accept Response transactions. The segment notes are also revised to clarify the use of these segments in National Fuel's service territory where both Utility Rate Ready consolidated billing and Single Retailer is offered. The notes for codes in the REF02 element of the REF*BLT and REF*PC segments are revised to clarify which codes should be transmitted for the Single Retailer Model (National Fuel Gas only). The REF03 element note for the REF*BLT (Bill Presenter) segment is revised to omit reference to the UBP. A REF*LF (E/M Late Fees) segment was added at the account level to enable E/Ms to communicate in an Enrollment Request transaction whether National Fuel Gas should calculate and assess E/M late fees when the customer's bill option is Utility Rate Ready consolidated billing. The REF*ALC (Human Needs Customer) segment notes are revised to indicate that this segment is required by National Grid only on gas enrollment requests for non-residential customers.

	Version 2.0 Continued
	Two segments were added at the account level to enable E/Ms to communicate to National Fuel Gas in an Enrollment Request transaction a customer's budget plan installment and pre-existing budget plan balance. The AMT*BD (E/M Budget Plan Balance) and AMT*B5 (E/M Budget Plan Installment Amount) are sent when a REF*NR (Current Budget Billing Status) segment is present in a Request transaction and the bill option for the customer being enrolled is Utility Rate Ready consolidated billing. The AMT*RJ (Commodity Price), AMT*FW (E/M Fixed Charge) and REF*RB (ESCO Rate Code) segment notes are revised to accommodate Enrollment Accept Response transactions for ESCO Referral Program enrollments initiated by the utility. AMT*RJ and AMT*FW may contain zeros or dummy codes in these Response transactions because the utility may be unable to provide the discounted commodity price for the customer enrolled at the time the Accept Response transaction is sent. The usage attribute for the REF*RB segment in an Enrollment Accept Response transaction is changed from 'Not Used' to 'Conditional'; National Grid may send this segment in an Accept Response transaction for ESCO Referral Program enrollments to provide the E/M with the rate code applicable to Referral Program participants. The element note for the NM109 element is revised to add a reference pertaining to the handling of un-metered service on an electric account in Orange & Rockland's service territory. All line references in the Comments column are updated.
October 23, 2014	Version 2.1
	Utility specific notes are generalized, as appropriate, and designated for relocation to/reference within Utility Maintained EDI Guides, as necessary. Replaced references to Marketer and E/M with ESCO.
	Adding these new segments from Case - 12-M-0476: REF*ON (Customer Shopping Status) REF*IJ (SIC/NAISC<u>Industrial Classification</u> Code), REF*TX (Utility Tax Exempt Status), REF*TDT (Account Settlement Indicator), REF*YP (NYPA/Recharge New York), REF*SG (Utility Discount) <u>Adding AMT03 field to the AMT*KZ segment to accommodate the ICAP Special Program Indicator Code.</u>

Row No	NY DD Field Name	Loop ID	Segment	Level	Position	Ref Desc	Name	Description	Code	Data Type	Request	Response	Comments
1	Transaction Set Header	None	ST	HDR	010	01	Transaction Set Identifier Code	Indicates Type of transaction	814	ID(3/3)	Required	Required	
2	Transaction Set Header	None	ST	HDR	010	02	Transaction Set Control Number	Number generated by senders system	ID#	AN(4/9)	Required	Required	
3	Beginning Segment	None	BGN	HDR	020	01	Transaction Set Purpose Code	Purpose of transaction	Request =13 Response =11	ID(2/2)	Required	Required	
4	Beginning Segment	None	BGN	HDR	020	02	Reference Identification	Unique and permanent ID for this transaction	ID#	AN(1/30)	Required	Required	
5	Beginning Segment	None	BGN	HDR	020	03	Date	Date transaction was created in senders system	CCYYMMDD	DT(8/8)	Required	Required	
6	Beginning Segment	None	BGN	HDR	020	06	Reference Identification	When BGN01=11, this element is the BGN02 from the original Request transaction or the text 'MANUAL' when a Response transaction does not have a corresponding Request transaction, for example in ESCO Referral Program enrollments.	ID# or MANUAL	AN(1/30)	Not Used	Required	When a Request transaction is sent by the ESCO the corresponding utility Response transaction should contain the BGN02 id from the Request transaction to enable the recipient to cross reference the response with the request transaction. This is particularly helpful when the Request transaction contains multiple requests in the LIN loop and the utility sends multiple responses in separate 814 Response transactions. When an Enrollment Accept Response transaction is initiated by the utility and there is no corresponding Request transaction, for example, in an ESCO Referral Program enrollment, the BGN06 element will contain the text 'MANUAL'.
7	Name (ESCO)	NI Loop	N1	HDR	040	01	Entity Identifier Code	Code identifying the ESCO in this transaction	SJ	ID(2/3)	Required	Required

23	Administrative Communications Contact (Customer Phone Number)	N1 Loop	PER	HDR	080	01	Contact Function Code	Code indicating that PER02 and Per03 contain contact information.	IC	ID 2/2	Not Used	Conditional	This segment will be sent by Central Hudson in an Enrollment Accept Response transaction to provide the telephone number for the customer enrolled by Central Hudson in an ESCO Referral Program. This segment may be sent by other utilities at their discretion.
24	Administrative Communications Contact (Customer Phone Number)	N1 Loop	PER	HDR	080	02	Communication Number Qualifier	Code indicating the information in PER03 is a telephone contact.	TE				
25	Administrative Communications Contact (Customer Phone Number)	N1 Loop	PER	HDR	080	03	Communication Number	Customer's phone number.	Phone number in the format xxxxyyzzzz or NOT AVAIL				Where there is no telephone number of record this element will contain the text 'NOT AVAIL'.
26	Name (Name for Mailing)	NI Loop	N1	HDR	040	01	Entity Identifier Code	Code identifying that REF02 contains the name associated with the mailing address on the account.	BT	ID(2/3)	Not Used	Conditional	When an enrollment request is accepted, the customer's mailing address must be returned on the response when the ESCO is the bill presenter and the mailing address is different than the service address. The address information in the N3/N4 segments must be accompanied by "name" information in an N1 segment to comply with X12 requirements. If both service and mailing address are being returned in a Response transaction, two N1 segments must be sent. See examples.
27	Address Information (Mailing Address)	NI Loop	N1	HDR	040	02	Name	Name associated with the mailing address	Text or the literal "NAME"	AN(1/60)	Not Used	Required	When mailing address is being returned, this element is required. See Comment on Line 26.
28	Address Information (Mailing Address)	NI Loop	N3	HDR	060	01	Address Information	Mailing Address - Street	Text	AN(1/55)	Not Used	Conditional	When mailing address is being returned, the N3 segment is required. See Comment on Line 26.
29	Address Information (Mailing Address)	NI Loop	N3	HDR	060	02	Address Information	If N301 exceeds 55 characters, the overflow is sent in N302	Text	AN(1/55)	Not Used	Conditional	When mailing address is being returned, this element is only used for the overflow when the street address exceeds 55 characters. See Comment on Line 26.
30	Geographic Location (Mailing Address)	NI Loop	N4	HDR	070	01	City Name	Mailing Address - City	Text	AN(2/30)	Not Used	Conditional	When mailing address is being returned, the N4 segment is required. See Comment on Line 26.
31	Geographic Location (Mailing Address)	NI Loop	N4	HDR	070	02	State or Province Code	Mailing Address - State/Province	Text	ID(2/2)	Not Used	Required	When mailing address is being returned, this element is required. See Comment on Line 26.

Row No	NY DD Field Name	Loop ID	Segment	Level	Position	Ref Desc	Name	Description	Code	Data Type	Request	Response	Comments
32	Geographic Location (Mailing Address)	NI Loop	N4	HDR	070	03	Postal Code	Mailing Address-zipcode	Text	ID(3/15)	Not Used	Required	When mailing address is being returned, this element is required. See Comment on Line 26.
33	Geographic Location (Mailing Address)	NI Loop	N4	HDR	070	04	Country Code	Mailing Address-Country Code	Text	ID(2/3)	Not Used	Conditional	See Comment on Line 26. This element is not used for domestic mailing addresses.
34	Item Identification	LIN Loop	LIN	DTL	010	01	Assigned Identification	Unique identifier assigned to this LIN request	Unique ID for each LIN request generated by the sender	AN(1/20)	Required	Required	This identifier by itself, or in conjunction with the BGN 02 identifier on a request must uniquely identify each LIN request item over time. The LIN01 identifier in the request must be returned in the LIN01 in the response to that request. See examples.
35	Item Identification	LIN Loop	LIN	DTL	010	02	Product/Service ID Qualifier	Indicates a service is being requested	SH	ID(2/2)	Required	Required	
36	Item Identification	LIN Loop	LIN	DTL	010	03	Product/Service ID	Commodity Type	EL or GAS	AN(1/48)	Required	Required	Only one commodity type per 814 transaction (either request or response).
37	Item Identification	LIN Loop	LIN	DTL	010	04	Product/Service ID Qualifier	Indicates a service is being requested	SH	ID(2/2)	Required	Required	
38	Item Identification	LIN Loop	LIN	DTL	010	05	Product/Service ID	Type of Request	CE=Enrollment GP=Gas Profile HU=Historic Usage	AN(1/48)	At least one on every request	At least one on every response	CE is the primary request; all others are secondary requests. If the primary request is rejected the secondary request will also be rejected. The request for history (EITHER HU OR GP) is the only secondary request. GP requests are only supported by utilities that provide gas profiles.
39	Action or Status Indicator	LIN Loop	ASI	DTL	020	01	Action Code	Indicator of the action or status of the LIN request	7=Request AC=Acknowledge U=Reject WQ=Accept	ID(1/2)	Required	Required	ASI01 must be "7" for all requests. AC, U, WQ codes are used for responses. A REF1P (see line 65) may be used to provide additional clarification when "AC" is used on the response.
40	Action or Status Indicator	LIN Loop	ASI	DTL	020	02	Maintenance Type Code	Used to differentiate between inquiries and other actions.	021=CE 029=GP or HU	ID(3/3)	Required	Required	
41	Reference Identification (Reject Response Reasons)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 contains a reason for rejecting the LIN request.	7G	ID(2/3)	Not Used	Conditional	This segment is required on reject responses. Not all reject codes pertain to all LIN requests. The response may contain more than one reject reason per LIN request.
42	Reference Identification (Reject Response Reasons)	LIN Loop	REF	DTL	030	02	Reference Identification		refer to codes listed in 814e IG	AN(1/30)	Not Used	Required	When a REF*7G is being sent this element is required. A13 should only be used infrequently, i.e. when none of the other codes are sufficient.

Row No	NY DD Field Name	Loop ID	Segment	Level	Position	Ref Desc	Name	Description	Code	Data Type	Request	Response	Comments
43	Reference Identification (Reject Response Reasons)	LIN Loop	REF	DTL	030	03	Description	Used to qualify an A13 or other codes sent in REF02	text	AN(1/80)	Not Used	Conditional	When REF02=A13, this element must be sent to clarify the reject reason. REF03 may also be used to provide further clarification of the reject reason when REF02 contains other codes.
44	Reference Identification (Response Information or Warnings)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 contains information associated with an accepted LIN request.	1P	ID(2/3)	Not Used	Optional	This segment may be sent to assist in clarifying an Accept Response.
45	Reference Identification (Response Information or Warnings)	LIN Loop	REF	DTL	030	02	Reference Identification		A13, API, FRB, 101, 102	AN(1/30)	Not Used	Optional	
46	Reference Identification (Response Information or Warnings)	LIN Loop	REF	DTL	030	03	Description	Used to qualify an A13 in REF02	text	AN(1/80)	Not Used	Conditional	This element must be sent when REF02 in this segment = A13 or API to clarify the details of the accept response. When REF02 contains FRB, 101 or 102, a REF03 may be sent to provide further clarification.
47	Reference Identification (ESCO Customer Account Number)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that the REF02 element contains the ESCO assigned account number for the customer	11	ID(2/3)	Conditional	Optional	Required on a request for enrollment when the Utility will be the bill presenter. May be returned on an Accept Response at the discretion of the parties.
48	Reference Identification (ESCO Customer Account Number)	LIN Loop	REF	DTL	030	02	Reference Identification	Customer's account number	Account #	AN(1/30)	Required	Optional	When a REF*11 is sent, this element is required. See Comment on Line 47.
49	Reference Identification (Utility Account Number)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that the REF02 element contains the Utility assigned account number for the customer	12	ID(2/3)	Required	Required	The customer's utility number is used for validation and must be present in all transactions.
50	Reference Identification (Utility Account Number)	LIN Loop	REF	DTL	030	02	Reference Identification	Customer's account number	Account #	AN(1/30)	Required	Required	When a REF*12 is sent, this element is required.

Row No	NY DD Field Name	Loop ID	Segment	Level	Position	Ref Desc	Name	Description	Code	Data Type	Request	Response	Comments
51	Reference Identification (Utility Account Number)	LIN Loop	REF	DTL	030	03	Description	Un-metered service designator (electric accounts only)	U	AN(1/80)	Conditional	Conditional	This element is only sent in Requests to, or provided in Responses from, a utility that elects this business practice in its Utility Maintained EDI Guide when the ESCO is enrolling only the un-metered service on an electric account that includes both metered and un-metered service. When the Request pertains to all service on an electric account this element is not used. The electing utility's Response transaction will contain this element if present in the Request transaction.
52	Reference Identification (Previous Utility Account Number)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 contains the Utility's previous account number for the customer	45	ID(2/3)	Not Used	Conditional	Required if Utility customer account number has changed within the last 90 days
53	Reference Identification (Previous Utility Account Number)	LIN Loop	REF	DTL	030	02	Reference Identification	Customer's old account number	Account #	AN(1/30)	Not Used	Required	When a REF*45 is returned, this element is required. See comment on Line 52.
54	Reference Identification (Utility Account Number for ESCO)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 contains a Utility assigned account number for the ESCO.	AJ	ID(2/3)	Conditional	Conditional	This segment may be provided on requests and responses by mutual agreement of the trading partners.
55	Reference Identification (Utility Account Number for ESCO)	LIN Loop	REF	DTL	030	02	Reference Identification	Utility account number for the ESCO	Account #	AN(1/30)	Required	Required	When a REF*AJ is being sent, this element is required.
56	Reference Identification (Meter Cycle Code)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 contains the meter cycle code for the account being enrolled.	65	ID(2/3)	Not Used	Conditional	This segment must be sent in an Enrollment Accept Response.
57	Reference Identification (Meter Cycle Code)	LIN Loop	REF	DTL	030	02	Reference Identification		Meter cycle code	AN(1/30)	Not Used	Required	When a REF*65 is sent, this element is required. See comment on Line 56.
58	Reference Identification (Meter Cycle Code)	LIN Loop	REF	DTL	030	03	Description	Description of the normal reporting period covered by usage data to be sent on the 867.	MON, BIM, QTR,	AN(1/80)	Not Used	Conditional	When a REF*65 is sent, this element may be sent if the data in REF02 is not sufficiently descriptive.
59	Reference Identification (Bill Cycle Code)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that the data contained in REF02/03 describes the bill cycle for the customer being enrolled	BF	ID(2/3)	Not Used	Conditional	This segment must be sent in an Enrollment Accept Response.

Row No	NY DD Field Name	Loop ID	Segment	Level	Position	Ref Desc	Name	Description	Code	Data Type	Request	Response	Comments
60	Reference Identification (Bill Cycle Code)	LIN Loop	REF	DTL	030	02	Reference Identification	Number indicating billing cycle.	cycle code	AN(1/30)	Not Used	Required	When a REF*BF is sent, this element is required. See comment on Line 59.
61	Reference Identification (Bill Cycle Code)	LIN Loop	REF	DTL	030	03	Description	text indicating how frequently the customer is billed.	MON, BIM, QTR	AN(1/80)	Not Used	Conditional	When a REF*BF is sent, this element may be sent if the data in REF02 is not sufficiently descriptive.
62	Reference Identification (Bill Presenter)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating REF02 identifies the bill presenter	BLT	ID(2/3)	Required	Required	This segment is required in Enrollment Request and Enrollment Accept Response transactions to request or confirm the customer's bill option.
63	Reference Identification (Bill Presenter)	LIN Loop	REF	DTL	030	02	Reference Identification		DUAL, ESP, or LDC	AN(1/30)	Required	Required	When a REF*BLT segment is present, this element is required. ESP should be used when the Single Retailer Model is in effect (NFG) or there is a Billing Agency relationship between the utility and the ESCO. See Comment on Line 62.
64	Reference Identification (Bill Presenter)	LIN Loop	REF	DTL	030	03	Description	If REF02=ESP and NY Billing Agency Model will be used.	text = AGENT	AN(1/80)	Conditional	Not Used	When a REF*BLT segment is sent, this element is required when the ESCO is the bill presenter and will use the NY Billing Agency Model (designated ESCOs in Con Edison's service territory only).
65	Reference Identification (Bill Calculator)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating REF02 identifies the bill calculator	PC	ID(2/3)	Required	Required	Required in Enrollment Requests and Accept Responses to identify which entity will calculate billed charges. If REF02=LDC in a Request transaction, the ESCO must send either an AMT segment in the LIN loop (AMT*RJ and/or AMT*FW) or a REF*RB in the NM1 Loop or the enrollment request will be rejected.
66	Reference Identification (Bill Calculator)	LIN Loop	REF	DTL	030	02	Reference Identification	Each party calculates their own charges or Utility is the bill calculator	DUAL or LDC	AN(1/30)	Required	Required	When a REF*PC is being sent, this element is required (See Comment on Line 65). If the bill option indicated in a Request transaction, via the REF*BLT and REF*PC segments is not offered in the service territory of the recipient utility the transaction will be rejected by every utility except those that elect to will accept the enrollment request but will send a REF 1P indicating "incorrect billing option requested".
67	Reference Identification (Current Budget Billing Status)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 will contain data on customer's budget billing status with the ESCO (req) and the Utility (resp).	NR	ID(2/3)	Conditional	Conditional	If present on the Request, the customer will be on budget billing with the ESCO. If present on the Enrollment Accept Response, the customer is currently on budget billing with the Utility.

Row No	NY DD Field Name	Loop ID	Segment	Level	Position	Ref Desc	Name	Description	Code	Data Type	Request	Response	Comments
68	Reference Identification (Current Budget Billing Status)	LIN Loop	REF	DTL	030	02	Reference Identification	The enrolling customer is (resp) or will be (req) on budget billing.	Y	AN(1/30)	Required	Required	When a REF*NR is being sent, this element is required. See Comment on Line 67.
69	Reference Identification (ESCO Late Fees)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 will indicate whether late fees will/will not be assessed by the utility on ESCO past due amounts for account being enrolled (Pay-As-You-Get-Paid Model only).	LF	ID(2/3)	Conditional	Conditional	This segment is required in Request transactions sent to NFG when the customer's bill option is Utility Rate Ready consolidated billing and the payment method is Pay-As-You-Get-Paid. A utility may choose to return this segment in an Enrollment Accept Response transaction.
70	Reference Identification (ESCO Late Fees)	LIN Loop	REF	DTL	030	02	Reference Identification	Late fees will/will not be assessed by the Billing Party on ESCO past due amounts for account being enrolled.	N2,Y2	AN(1/30)	Required	Required	This element is required when a REF*LFsegment is being sent.
71	Reference Identification (Partial Participation Portion)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 contains data on the load to be supplied by the ESCO for partial requirements customers.	PGC	ID(2/3)	Conditional	Conditional	This segment is required by some utilities when the customer being enrolled is a partial requirements customer, i.e. a portion of the customers load is eligible for special pricing under an Economic Incentive program such as Power for Jobs. If this segment is applicable to the customer that is being enrolled and is NOT sent, the enrollment request will be rejected.
72	Reference Identification (Partial Participation Portion)	LIN Loop	REF	DTL	030	02	Reference Identification	ESCO will serve base load or total load.	B (base) or T (total)	AN(1/30)	Required	Required	When a REF*PGC is being sent, this element is required. See Comment on Line 71.
73	Reference Identification (Customer on Life Support)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 contains data on customers need for life support equipment.	SU	ID(2/3)	Conditional	Optional	Must be present in Request transactions for the Single Retailer Model or the Enrollment may be rejected. May be returned in an Enrollment Accept Response at the option of the Utility.
74	Reference Identification (Customer on Life Support)	LIN Loop	REF	DTL	030	02	Reference Identification	Indicates whether life support equipment is necessary or is being investigated.	I, N, or Y	AN(1/30)	Required	Optional	When a REF*SU is being sent, this element is required. See Comment on Line 73.

Row No	NY DD Field Name	Loop ID	Segment	Level	Position	Ref Desc	Name	Description	Code	Data Type	Request	Response	Comments
75	Reference Identification (Gas Pool ID)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 identifies the id for the gas pool for the customer being enrolled.	VI	ID(2/3)	Conditional	Conditional	This segment must be sent when the Enrollment Request is for Gas service and the ESCO has been assigned more than one Gas Pool ID for their customers. Must be returned on the Response if sent on the Request. If this segment is not present in Requests sent to utilities that require Gas Pool IDs, the enrollment will be rejected.
76	Reference Identification (Gas Pool ID)	LIN Loop	REF	DTL	030	02	Reference Identification	The pool id for the sub-grouping of customers that the enrolling customer will be assigned to.	ID#	AN(1/30)	Required	Required	When REF*VI is sent, this element is required. See Comment on Line 75.
77	Reference Identification (Gas Capacity Assignment/Obligation)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 contains data on pipeline capacity	GC	ID(2/3)	Conditional	Conditional	Gas Enrollments Only. Use this segment to convey intended or obligated pipeline capacity requirements necessary to meet the needs of the end use customer. Not used when commodity is electric. Required on the Request when supported by the Utility. Will be returned in the Enrollment Accept Response when received on the Request and supported by the Utility.
78	Reference Identification (Gas Capacity Assignment/Obligation)	LIN Loop	REF	DTL	030	02	Reference Identification	ESCO will, or must, take assignment of utility's pipeline capacity for the customer being enrolled (Y) or ESCO will arrange for pipeline capacity (N)	Y or N	AN(1/30)	Required	Required	When REF*GC is being sent, this element is required. See Comment on Line 77.
79	Reference Identification (Gas Supply Service Options)	LIN Loop	REF	DTL	030	01	Reference Identification Qualifier	Code indicating that REF02 designates the balancing or storage option for the customer being enrolled.	GS	ID(2/3)	Conditional	Required	Gas Enrollments Only. Required on the Request for utilities that indicate a requirement in their Utility Maintained EDI Guides. If not present, the enrollment will be rejected. May be sent in other service territories at the discretion of the utility. Will be returned in an Enrollment Accept Response if sent on the Request and supported by the Utility.
80	Reference Identification (Gas Supply Service Options)	LIN Loop	REF	DTL	030	02	Reference Identification	Balancing or storage option for gas delivery	B or S	AN(1/30)	Required	Required	When REF*GS is being sent, this element is required. See Comment on Line 79.
81	Reference Identification (Gas Supply Service Options)	LIN Loop	REF	DTL	030	03	Description	Used to qualify the Balancing service option	D or M	AN(1/80)	Conditional	Conditional	When REF*GS is being sent AND REF02="B", this element must be sent on Requests to National Grid to indicate the balancing period (Daily or Monthly).

4291 30	Reference Identification (Use Time of Day)	NM1 Loop	REF	DTL	130	01	Reference Identification Qualifier	Code indicating that REF02 will qualify the usage data to be sent on this meter in the 867.	TU	ID(2/3)	Not Used	Conditional	This segment must be present in an Accept Response when the commodity type is electric and the REF*MT=COMBO. This segment is used to indicate that a measurement period for a service point is further disaggregated into time of day periods such as on peak, off peak, etc. This segment is also used to describe measurement types when multiple measurement types will be reported on 867 for a single service end point such as a meter that is capable of measuring both demand and kilowatt hours.
4301 31	Reference Identification (Use Time of Day)	NM1 Loop	REF	DTL	130	02	Reference Identification Qualifier		41, 42, 43, 45, 49, 50, 51, 57, 58, 73, 74, 75, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, or 94	AN(1/30)	Not Used	Required	When a REF*TU segment is being sent, this element is required. See Comment on Line 448 130.
4341 32	Reference Identification (Use Time of Day)	NM1 Loop	REF	DTL	130	03	Description	Use this element to describe a meter's capabilities when the MT segment is "COMBO" in the 02 element. Use the codes to describe the meter's capabilities in the 03 element of the TU segment.	Type: K1, K2, K3, K4, K5, or KH Interval: BIM, DAY, MON, QTR, or 001-999 for minutes.	AN(1/80)	Not Used	Required	This element is required in a REF*TU segment to associate the time of day interval in the REF02 element with the unit of measurement.
4321 33	Reference Identification (ESCO Rate Code)	NM1 Loop	REF	DTL	130	01	Reference Identification Qualifier	Code indicating that REF02 will contain the ESCO rate code associated with the service point(s) identified in the NM1 segment.	RB	ID(2/3)	Conditional	Conditional	Required in an Enrollment Request when the bill option is Utility rate ready consolidated billing and the ESCO charges will be calculated based on rate codes instead of commodity prices. Required in an Enrollment Accept Response when present on the Request. If this segment is required and is not sent, the enrollment request will be rejected. When an Enrollment Accept Response transaction, initiated by a utility that elects this business practice in its Utility Maintained EDI Guide, does not have a corresponding Request transaction, this segment in an Accept Response transaction may contain a rate code specified by the utility in its BSA.

Row No	NY DD Field Name	Loop ID	Segment	Level	Position	Ref Desc	Name	Description	Code	Data Type	Request	Response	Comments
1331 34	Reference Identification (ESCO Rate Code)	NM1 Loop	REF	DTL	130	02	Reference Identification Qualifier		text	AN(1/30)	Required	Required	When a REF*RB segment is being sent, this element is required. See Comment on Line 424 133.
1341 35	Transaction Set Trailer	None	SE	DTL	180	01	Number of Included Segments	Number of segments in this transaction.	#	NO 1/10	Required	Required	Required in all transactions.
1351 36	Transaction Set Trailer	None	SE	DTL	180	02	Transaction Set Control Number		ST02	AN(4/9)	Required	Required	Required in all transactions.
